Lacock

1855

In Chippenham market, on Friday last, Mr. Keevil, of Lacock, exhibited a cheese apparatus, for cutting, filtering and pressing curd, for which he has obtained her Majesty's letters patent. This apparatus, in all the processes of cheese making, effects such a great saving of labour and waste, with a degree of cleanliness, as must recommend it to every dairy farmer. **Devizes & Wiltshire Gazette, 18 October**
