

Bicycle Collision

On Saturday evening, whilst riding a bicycle through the Market Place a lad named Green came into a collision with a carriage, in which were Mr. and Miss. Mitchell, of Mere Park. The lad was thrown upon the shaft, and the horse then bolted, placing the lad in great danger of falling beneath the wheels.

Inspector Lampard, who was standing near, ran forward and released the lad from the shaft, but was himself caught by the wheel, and both were knocked down.

The lad was picked up in an unconscious condition, but recovered shortly afterwards. The Inspector sustained a rather serious fracture of the muscle of the knee. Surgical aid was obtained, and although Mr. Lampard is making satisfactory progress it is understood it will be some little time before he will be able to resume his duties.
