

## Patents and Their Inventors

A patent is an official document given to an inventor by a government. This document generally gives inventors the right to stop anyone else from copying, using, distributing or selling the invention without their permission.

Year	Date	Surname	Given Names	Abode	Occupation	Description of Invention and Notes
1840	21-Jan	Stone	William	Winsley	Gentleman	Manufacture of wine. Stones British wine is well known, but I am unable to say whether this patent formed the foundation of what is, I believe, a large concern. (Research shows that the Stone's British Wine company were well established before this patents was taken out)
1805	19-Nov	Wyke	George	Winsley	Esquire	Machinery for working pumps. This man seems to have subsequently removed to Bath, where he took out three other patents.
